**Nikon Digital SLR Camera D3200 Specifications**

- **Exposure**
  - Self-timer: 2 s, 5 s, 10 s, 20 s; 1 to 9 exposures
  - Frame advance rate: Up to 4 fps (manual focus, mode M or S, shutter speed 1/250 s or faster, and other settings at default values)
  - Frame coverage: Approx. 95% horizontal and 95% vertical

- **Speed**
  - 1/4,000 to 30 s in steps of 1/3 EV; Bulb; Time (requires optional ML-L3 Remote Control)

- **Image sensor**
  - Total pixels: 24.7 million
  - Image sensor: 23.2 × 15.4 mm CMOS sensor

- **Flash**
  - Flash sync speed: X=1/200 s; synchronizes with shutter at 1/200 s or slower
  - Flash control: • TTL: i-TTL flash control using 420-pixel RGB sensor is available with built-in flash or optional flash unit

- **Metering**
  - TTL exposure metering using main image sensor

- **ISO sensitivity**
  - ISO 100 to 6400 in steps of 1 EV; can also be set to approx. 1 EV above ISO 6400

- **Dust-reduction System**
  - Image Sensor Cleaning

- **Lens**
  - Lens mount: Nikon F mount (with AF contacts)

- **Viewfinder**
  - Eyepoint: 18 mm (-1.0 m⁻¹)
  - Diopter adjustment: -1.7 to +0.5 m⁻¹
  - Focus: • Autofocus (AF): Single-servo AF (AF-S); full-time-servo AF (AF-F)
  - Focus lock: Focus can be locked by pressing shutter-release button halfway

- **Monitor**
  - Approx. 100% frame coverage, and brightness adjustment

- **Playback**
  - Full-frame and thumbnail (4, 9 or 72 images or calendar) playback with approx. 1:4, normal (approx. 1:8) or basic (approx. 1:16) compression

- **Audio**
  - Video compression: H.264/MPEG-4 Advanced Video Coding

- **Video**
  - Video output: HDMI standard (supports 1920×1080, 30p)

- **Dimensions/weight**
  - Dimensions (W × H × D): Approx. 125 × 96 × 76.5 mm/5.0 × 3.8 × 3.1 in.
  - Approx. 455 g/1 lb (camera body only)

- **Humidity**
  - Less than 85% (no condensation)

- **Temperature**
  - 0 to 40°C/32 to 104°F

- **Power source**
  - Battery: One EN-EL14 Rechargeable Li-ion Battery

- **Accessories**
  - AC Adaptor EH-64B (available separately), UC-E16 USB Cable, EH-CP16 Charger, CB-500W Charger Cord, Strap AN-DC10, ViewNX 2 CD-ROM

- **Supported languages**
  - Japanese, Korean, Norwegian, Polish, Portuguese (Portugal and Brazil), Russian, Simplified Chinese, Traditional Chinese, Spanish, Thai, and Turkish

- **HDMI**
  - HDMI output: Type C mini-pin HDMI connector

- **Interface**
  - Accessory terminal: MC-DC2 Remote Cord (available separately), GP-1 GPS Unit (available separately)

- **File format**
  - • NEF (RAW): 12 bit, compressed
  - • JPEG: JPEG-Baseline compliant with fine, medium, and high/normal compression

- **Language**
  - English, French, German, Italian, Japanese, Spanish, Traditional Chinese, Simplified Chinese, and Russian

- **Control**
  - ViewNX 2 CD-ROM

- **Exif**
  - (Exchangeable Image File Format for Digital Still Cameras) 2.3
High resolution with 24.2 effective megapixels, and a high-quality lens to match

Experience the incredibly high image quality that you’ve been dreaming of. Combining 24.2 effective megapixel definition with Nikon’s all-new DX-format imaging sensor and the superior optical performance of NIKKOR lenses, the new Nikon D3200 brings you exceptional pictures with smooth color gradation and Full HD movies. Easy to hold and simple to use, this exciting, perfectly balanced combination of lens and camera is designed specifically to make the joy of high-quality D-SLR photography available to all.

24.2 Effective megapixels

- Lens: AF-S DX Micro NIKKOR 40mm f/2.8G
- Exposure: [A] mode, 1/200 second, f/5.6
- White balance: Auto
- Sensitivity: ISO 200
- Picture Control: Portrait
At the heart of the D3200 is a newly developed Nikon DX-format CMOS image sensor utilizing 24.2 effective megapixels for pictures with incredible detail, as well as the freedom to enlarge your images or crop them to your preference. The camera’s image sensor has a wide light sensitivity range, going as high as ISO 6400* and permitting the capture of excellent images even when the light is low. The driving force behind these advancements is the high-speed, high-performance EXPEED 3 image-processing engine — the same as that used by the Nikon D4 flagship camera — transforming digital data into superior quality images with smooth color and spectacular detail. Other Nikon advantages include a 420-pixel RGB sensor that provides input for Nikon’s exclusive Scene Recognition System. When taking pictures, each scene is analyzed and the focus, exposure, and white balance are automatically adjusted to ensure optimum results. Last but not least, superior image quality requires superior optics: the Nikon D3200 works with an extensive range of NIKKOR lenses, the same lenses used by experienced photographers around the world to get the most out of their Nikon D-SLR cameras. Add up all of the advantages and you can see why the Nikon D3200 is an excellent choice for experiencing D-SLR photography.

* ISO range can be raised as high as HI 1 (ISO 12800 equivalent), giving you more options in extremely low-light conditions.
Step-by-step instructions for incredible images: Guide Mode

Are you new to D-SLR photography? The D3200 makes it easy to take the pictures that you’ve always wanted. Step by step, Nikon’s Guide Mode walks you through the process of set-up, shooting, viewing and deleting. Simply select ‘Easy operation’ for help with taking pictures of the most common situations and subjects, such as Close-ups or Portraits. Choose ‘Advanced operation’ for more creative options, such as Soften backgrounds or Freeze motion. The helpful Assist images provide visual reference examples in order to illustrate the expected results, and help you to better understand how to achieve the type of images you want.

Select this mode and the camera automatically optimizes your settings appropriately for shooting close-ups of flowers and other small objects.

Easy Operation

Select the mode and the camera automatically optimizes your settings accordingly for shooting close-ups of flowers and other small objects.

Advanced Operation

Select this option for dramatic sunset shots. The white balance is adjusted to emphasize the warm tones of the setting sun.

Be confident of capturing the moment: continuous shooting at approx. 4 frames per second

The movement, position and expression of your subject can be unpredictable, and you may never know exactly when a definitive moment might happen. For times like these, the D3200 offers a frame rate of approx. 4 frames per second, allowing a burst of images to capture a decisive moment during sporting events and when taking pictures of elusive pets or children at play with full autofocus performance.

Excellent results for almost any subject

In addition to Guide Mode assistance, the D3200 offers familiar Scene Modes. Simply select one of the six icons on the mode dial: Portrait, Landscape, Child, Sports, Close up or Night portrait. Instantly, the camera is now set to automatically deliver optimal results for your shooting situation. Further creative D-SLR options put aperture and shutter speed under your control, either combined — P (programmed auto), individually — S (shutter-priority auto) and A (aperture-priority auto), or independently — M (manual).

Live view very easy operation and sharp focus

D-SLR shooting is easy with “live view.” Whether taking stills or recording movies, there are four convenient AF-area modes to choose from: face-priority AF, wide-area AF, normal-area AF and subject-tracking AF. The combination of subject-tracking AF and full-time servo AF (AF-F) maintains the focus point as the action progresses.

Still photography with faster response: the optical viewfinder

D-SLR cameras are noted for showing exactly what the lens is seeing. Use of the viewfinder offers more stability, a clearer view and more precise composition for landscape, portrait and still life photography — advantages that enable you to better capture images at the right moment.

Reliable, accurate and responsive autofocus: 11-point AF system

When taking pictures through the optical viewfinder, the 11-point AF system quickly and precisely detects your subject. To ensure rapid and accurate autofocus, choose dynamic-area AF* or 3D-tracking (11 points)* to capture fast-moving subjects or to change your composition freely while keeping the subject in sharp focus. If you want a specific area of your subject to stay sharp, choose single-point AF.

*When focus mode is continuous-servo AF (AF-C) or auto AF-S/AF-C selection (AF-A).

Live view shooting convenience: Scene Auto Selector instantly selects settings to match a scene

If you are taking still pictures using D3200’s “live view” monitor and are using the Auto or Auto (Flash off) functions, the Scene Auto Selector can automatically select the most appropriate set-up from a choice of options: Portrait, Landscape, Close up and Night portrait. The D3200 self-configures to ensure optimum results, leaving you more time to concentrate on composition.

Scene Modes and other creative options: get the best results for each scene

Everything you need to create a masterpiece
Known for its reliability, clarity and devotion to the needs of passionate photographers, Nikon’s exclusive lens brand NIKKOR has come to represent the finest optics in the world. Join the community and share a love of great photography with photographers across the globe.

**AF-S DX NIKKOR 55-300mm f/4.5-5.6G ED VR**
This powerful super-telephoto zoom with Vibration Reduction (VRII) lets you get close to distant subjects while shooting handheld. The strong compression effect makes for dynamic images. Great for sports and wildlife.

**AF-S DX NIKKOR 35mm f/1.8G**
Compact prime lenses like this one deliver beautiful background blur in portraits, as well as sharp handheld pictures — even in low light.

**AF-S DX Micro NIKKOR 40mm f/2.8G**
A compact micro lens designed to capture small subjects at close distances, featuring a large maximum aperture of f/2.8. This is ideal for life-size (1x) close-ups and is also suitable for portraits and landscapes as a standard lens.

Incredible movie recording at your fingertips: Full HD movies (1,920 x 1,080/30p)
The D3200 is not limited to taking outstanding still pictures. It also delivers outstanding D-Movie performance with Full HD movie capability. Together with D-SLR advantages such as beautiful bokeh (background blur), great low-light performance and extensive compatibility with the NIKKOR lens range, making your own movies has just become easier and more creative than ever before. The features of “live view” autofocus like full-time-servo AF (AF-F) and subject-tracking AF are completely compatible when recording D-Movies, so your subject will stay in sharp focus, even when in motion. Face-priority AF is also available during D-Movie, which means you can stop worrying about focusing on faces and enjoy movie recording. The D3200 also records sound and comes equipped with in-camera editing functions, giving you movie production potential.

**NIKKOR**

VR (Vibration Reduction) technology to minimize the effects of camera shake
NIKKOR lenses incorporate the VR function within the lens rather than within the camera body. This ensures that blur caused by camera shake is corrected in the optical path before it reaches the sensor, leading to clearer images and faster responses. Furthermore, the image in the viewfinder is stabilized, allowing easier and more accurate composition.

Connecting the optional Wi-Fi 1a Wireless Mobile Adapter to the D3200 allows you to take pictures and then send them wirelessly to a smart device* such as smartphone or tablet — a quick and easy way to share your images via social networking services (SNS) or e-mail. You can even release the D3200’s shutter from the smart device, as well.

ViewNX 2 (supplied) — Your Imaging Toolbox

ViewNX 2 is the convenient way to manage images on your computer, with useful functions for storing, viewing, editing and sharing both photos and movies. Labels can be attached to images, facilitating faster searches later on. This bundled software also offers a wide range of editing functions, including rotate, resize, crop, straighten, auto red-eye correction and more.

my Picturetown — smart photo sharing and storage service

my Picturetown allows you to easily save, organize and share your images with family and friends worldwide. Membership is free and permits storage of up to 2 GB of photos and/or movies. For an additional fee, you can expand your online storage of up to 2 GB of photos and/or movies.

Nikon Speedlights — simply brilliant

The D3200 comes equipped with a convenient built-in pop-up flash, but with optional Speedlights, inspired flash photography becomes even easier and more creative. The compact and lightweight SB-400 delivers intelligent through-the-lens (i-TTL) flash control and bounce flash capability for a more natural lighting effect without strong shadows. The multifunctional SB-700 offers the exciting potential of wireless multiple flash operation using the Nikon Creative Lighting System.

System chart

Approved memory cards

The following memory cards that have been tested and approved for use in the D3200 are listed below. Loading may not be complete for all cards with certain write speeds:

- Secure Digital (SD) memory cards
- Secure Digital High Capacity (SDHC) memory cards
- Secure Digital eXtended Capacity (SDXC) memory cards

Memory card capacity

The following table indicates the approximate number of pictures that can be stored and the approximate recording time for full HD movies on each memory card. Note that number of shots may vary depending on the usage of the D3200. The number of scenes that can be recorded may differ when you use memory cards which have not been tested for use with the D3200. The figures indicate approximate results. The number of scenes or pictures that can be recorded varies according to the number of times the memory card’s power switch is turned on. For information on memory card capacity, see the manual for your memory card.
